

BECOME A LIFE LINE
WITH A REWARDING CAREER

Advanced Emergency Medical Technician (AEMT)

[HEALTH OCCUPATIONS]

Expand your scope of practice by becoming an AEMT. These healthcare professionals have an expanded range of skills and abilities, allowing you to perform more advanced procedures such as administering certain medications, interpreting electrocardiograms (ECGs) and using advanced airway devices. Make a difference in your community by filling this in-demand role.

LEARNING AT WASHBURN TECH

The Advanced Emergency Medical Technician (AEMT) program offers a flexible schedule to accommodate students currently working as EMTs. It prepares you to recognize, assess and manage medical emergencies in prehospital settings and to supervise ambulance personnel. For two semesters, students must attend two nights a week and one Saturday each month. Upon completion of the 20-credit-hour program, you will be prepared to take the AEMT exam. You must be 18 years old to take the course and the certification test.

JOB AND SALARY OUTLOOK

The U.S. Department of Labor predicts good job prospects, due in large part to increasing call volume because of the aging baby boomer population. Locally, community partners have indicated a need for this professional. According to the Kansas Department of Labor,

the entry-level salary for an EMT/paramedic is \$16.21 an hour or \$33,710 annually. The average wage is \$20 an hour or \$41,590 annually.

ENTRY REQUIREMENTS

Students are required to have already earned an EMT certificate and Basic Life Saving (BLS) certification. In addition, they must have a minimum score of 5 in Reading and Math on the Accuplacer exam or receive faculty/director approval. Please see an admissions counselor for details. Students must complete an application, undergo a background check and submit an official copy of all transcripts. Certain immunizations, a medical exam and medical insurance also are required.

Advanced Emergency Medical Technician (AEMT)

COURSE DESCRIPTIONS

ADVANCED EMT I: MEDICAL EMERGENCIES

This course addresses current information and techniques considered the responsibility of the AEMT according to the National Highway Traffic Safety Administration, National Standard Curriculum, as enriched by the KSBEMS Education Standards. It focuses on medical terminology, the human body, advanced patient assessment and advanced pharmacology. Topics include: didactic and practical skills instruction, skills demonstrations, clinical experience and/or orientation to the emergency room and to the ambulance, extrication class or in contrived experiences of patient care.

ADVANCED AEMT II: TRAUMA EMERGENCIES

This course is a continuation of the first course with focus on didactic and practical skills instruction, skills demonstrations, clinical experience and/or orientation to the emergency room and to the ambulance, extrication class, or in contrived experiences of patient care.

ADVANCED AEMT: FIELD INTERNSHIP I

This course will enable the student to have hands-on experience utilizing the knowledge and skills gained in the previous courses. The student will be supervised and evaluated by an assigned preceptor on the ability to assess and manage traumatic and medical emergencies.

ADVANCED AEMT: FIELD INTERNSHIP II

This course builds on the previous course. Students will have hands-on experience utilizing the knowledge and skills gained. An assigned preceptor will supervise and evaluate on the ability to assess and manage traumatic and medical emergencies. The student will be evaluated in the classroom, field and clinical setting.

Please note: Students must be at least 18 years of age to take this program. Financial aid is not available to students who enroll.
