

Building Technology

The Building Technology program offers a 48 credit technical certificate that prepares individuals to apply technical knowledge and skills to address maintenance of a building's function and service within a variety of structures - commercial and residential. Instruction includes basic theory and hands-on experience in electrical, carpentry, plumbing and heating ventilation and air conditioning. Upon completion, graduates are qualified for employment in the construction and maintenance of hospitals, motels, apartment complexes, schools, and other businesses. Students also have the opportunity to earn EPA Section 608 Certification.

Full time students can complete the program in one calendar year. Part time, including high school students, can complete the program in four semesters. Students who successfully complete the program may be eligible to complete their associate's degree at Washburn University.

The program consists of the following courses:

- Basic Electricity
- Basic Electrical Lab
- Basic Carpentry
- Basic Carpentry Lab
- Plumbing Basics
- Plumbing Basics Lab
- HVAC
- HVAC Lab
- Workplace Skills
- Building Technology On the Job Training
