Law Enforcement and Schools, A Dynamic Partnership

Relationships between police and schools can benefit law enforcement, education and the community if they are thoughtfully planned and professionally administered. School police liaison programs provide a means of effective communication that can be of significant value during a crisis situation. - US Department of Justice

A school-law enforcement partnership is a process rather than an event. Partnerships do not just happen when a law enforcement officer is assigned to a school, but are built on a foundation of shared goals, ongoing communication and positive relationships. - Guides to Creating Safer Schools

This training will provide the student with an understanding of how to initiate and foster a relationship between schools and law enforcement by focusing on the following:

- Developing partnerships
- Role of a school officer
- Legal considerations
- Emergency plans
