

**PROGRAM YOUR FUTURE
FOR SUCCESS**

Information Systems Technology

[COMPUTER & NETWORKING TECHNOLOGY]

Computer service professionals support the rapidly changing way people and businesses communicate. Our students learn to install, configure and support local area networks as well as wide area networks. Students also learn to monitor the network to ensure availability, security and website performance.

LEARNING AT WASHBURN TECH

The first two semesters of this half-day program provide a hands-on introduction to the inner workings of computers. Instruction covers computer hardware, Microsoft and Linux network operating systems, directory services, cyber security, Web service, LAN/WAN technologies and messaging services. The final two semesters provide the opportunity to set-up and maintain networking devices such as routers, switches and WAN connections to share data and resources on the network. Upon successful completion, you will earn a 48-credit-hour technical certificate and be eligible to complete an associate degree or more advanced degrees at Washburn University. Evening classes also are available.

JOB AND SALARY OUTLOOK

Job prospects are excellent, according to the U.S. Department of Labor, as firms continue to

rely on computer networks and invest in new technologies. Kansas Department of Labor reports the entry-level wage for a network and computer systems administrator in 2018 was \$19.47 an hour or \$40,490 annually. The average salary was \$46,980 a year or \$22.59 an hour.

ENTRY REQUIREMENTS

Students must take the Accuplacer exam and score a minimum of 5 in both reading and math. Other assessments or college coursework can be accepted in place of this test. Please see a recruiter for details. You also must complete an application and submit transcripts.

CERTIFICATIONS

- + CompTIA A +
- + CompTIA Network +
- + CompTIA Security +
- + MD-100 Microsoft Windows 10
- + Red Hat Certified System Admin.
- + Cisco Certified Network Assoc.

Information Systems Technology

COURSE DESCRIPTIONS

PC HARDWARE FUNDAMENTALS

Covers the fundamentals of PC hardware technology, networking, laptop and printer operations

PC SOFTWARE FUNDAMENTALS

Learn to connect computers to the Internet and share resources

FUNDAMENTALS OF COMPUTER NETWORKING

Introduces the fundamental building blocks that form a modern network

NETWORK OPERATING SYSTEMS I & II

Covers Microsoft Windows 2008/2012 operating system and Linux network operating system

NETWORK SECURITY FUNDAMENTALS

Introduces knowledge and skills required to assess the security posture of an enterprise environment and recommend/implement appropriate security solutions

DESKTOP OPERATING SYSTEMS (EVENING)

Introduces operating system basics with the intent of giving students a deeper understanding of various operating systems

INTRO TO ENTERPRISE NETWORKING & LAB

Introduces the architecture, structure, functions, components and models of the Internet and other computer networks

ROUTING/SWITCHING ESSENTIALS & LAB

Students learn to configure and troubleshoot routers and switches and resolve common issues with standard access control lists and Network Address Translation for IPv4

WORKPLACE SKILLS I & II

Learn to create technical summary documents, sets of instructions, technical illustrations and presentations; work on cover letters, resumes and interview skills

SCALING NETWORKS & LAB

Learn to configure and troubleshoot routers and switches and resolve common issues with OSPF, EIGRP and STP in both IPv4 and IPv6 networks

CONNECTING NETWORKS & LAB

Covers WAN technologies and network devices; students learn to configure and troubleshoot network devices and resolve common issues with data link protocols, extended and IPv6 access control lists along with Quality of Service (QoS)
