

FRAME YOUR FUTURE  
WITH A GREAT CAREER

# Carpentry

(Building Technology)

[CONSTRUCTION]

If you want a career that is hands-on, challenging and driven by deadlines, building technology or carpentry might be made for you. A construction trades technician works on both commercial and residential projects. Our program prepares you in several different areas, from surveying and concrete work to drywall and framing.

**LEARNING AT WASHBURN TECH**

This program, also called Carpentry, covers basic theory and hands-on experience in carpentry, framing and masonry. Attending half-day, you can complete the program in two semesters and earn a 25-credit-hour technical certificate.

**JOB AND SALARY OUTLOOK**

Employment is expected to grow much faster than average for construction carpenters. According to the Kansas Department of Labor, the average entry-level salary for a construction carpenter in 2018 was \$13.66 an hour or \$28,410 annually, and the average salary was \$19.35 an hour or \$40,240 annually. Carpenters' District Council for our area reports the current average wage for a union residential carpenter is \$16.50 an hour and \$24.28 an hour for a union carpenter.

**ENTRY REQUIREMENTS**

Students are required to meet the minimum score on an assessment test. Washburn Tech offers the Accuplacer. A score of 4 in both reading and math is required. Other assessments or college coursework can be accepted in place of Accuplacer. Please see a recruiter for details. Students also must complete an application and submit an official copy of all transcripts.

**CERTIFICATIONS**

- + OSHA-30 Construction
- + NCCER Core
- + Carpentry I
