

BECOME THE FIRST
TO DELIVER LIFESAVING CARE

Foundations of Healthcare: Emergency Medical Responder (EMR)

[HEALTH OCCUPATIONS]

Arriving first on the scene of an emergency carries a huge responsibility. Emergency Medical Responders or EMRs assess the scene and prepare the area for the arrival of emergency medical services professionals. This fundamental training also lays the groundwork for students wanting to become an EMT or paramedic.

LEARNING AT WASHBURN TECH

Pursue a solid foundation in the Emergency Medical Services field by starting with Washburn Tech's EMR program. Curriculum in this program covers our Foundations of Healthcare core. Students learn the basics of health occupations as well as medical terminology and first aid/CPR. Then, in the Emergency Medical Responder course, you will train to become the first person responding to an emergency incident. Upon completion, you will be eligible to sit for the NREMT and Kansas Emergency Medical Responder Practical and Written Exams. **This program is designed for high school students. You must be 17 years old by the start of the program.**

JOB AND SALARY OUTLOOK

The U.S. Department of Labor predicts good job prospects, due in large part to increasing call volume because of the aging population.

According to the Kansas Department of Labor, the average salary for an entry-level emergency responder is \$11.11 an hour or \$23,110 annually. The average wage is \$12.65 an hour or \$26,320 annually.

ENTRY REQUIREMENTS

For dual-credit high school students submission of an application, official partial transcript, and consent to enroll form are required. Students must undergo a background check. Certain immunizations, a medical exam and medical insurance also are required. Please see an admissions counselor for details.
